

EndoSoft Ltd Carbon Reduction Plan

Suppliername: ...UTECH PRODUCTS LIMITED.

Publication date:10.06.26.....

Commitment to achieving Net Zero

Endosoft Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2026														
2026 is the first year of compiling a Carbon Reduction Plan, we will be building on this month by month with measurements taken at board, 2025 we will take action to reduce our emissions. 2026 we will report on this.														
Utech's baseline year emissions are categorized into three scopes:														
Baseline year emissions:														
EMISSIONS	TOTAL (tCO₂e)													
Scope 1	<p>1. Company-owned vehicles Ltd emissions from fuel consumption in company-owned vehicles Endosoft Limited expects 100% of company Vehicles to be electric-powered by 2030. We have already started to implement this here. In March 2025 one of the company cars was replaced from 148g to 0 emissions</p> <p>Company Leased vehicles Total CO₂e:</p> <table border="1"> <thead> <tr> <th>Make/Model</th> <th>Gas/Hybrid/Electric</th> <th>CO₂e</th> </tr> </thead> <tbody> <tr> <td>Kia Sportage</td> <td>Plugin Hybrid</td> <td>25gm/km</td> </tr> <tr> <td>VW ID 4</td> <td>Electric</td> <td>0</td> </tr> <tr> <td>AUDI Q4 ETRON 45W</td> <td>Electric</td> <td>0</td> </tr> </tbody> </table>		Make/Model	Gas/Hybrid/Electric	CO ₂ e	Kia Sportage	Plugin Hybrid	25gm/km	VW ID 4	Electric	0	AUDI Q4 ETRON 45W	Electric	0
Make/Model	Gas/Hybrid/Electric	CO ₂ e												
Kia Sportage	Plugin Hybrid	25gm/km												
VW ID 4	Electric	0												
AUDI Q4 ETRON 45W	Electric	0												

	<p>These are the changes we have made within our business thus far and this will continue every time a vehicle is up for lease contract renewal, until all cars are fully electric.</p> <p>UTECH employees are encouraged to reduce travel emissions by encouraging virtual meetings and conferences in place of face-to-face meetings. This is now in place and over 70% of our meetings take place via Teams</p> <p>UTECH employees are currently 65% working from home. There is a mix of usage of laptops and desktop computers.</p>
Scope 2	<p>Our organisation occupies leased office space at The Dock, 75 Exploration Drive, which is part of the Newcastle Helix development. The landlord manages all building-level utilities and environmental reporting. At present, no tenant-specific or building-level carbon-footprint data is provided to occupants. As a result, we do not have an individual carbon footprint for this location. We rely on the landlord's site-wide sustainability measures, which include low-carbon district energy systems and BREEAM-rated buildings."</p>
Scope 3	<p>UTECH/ currently operates one (1) data centre from the Headquarters. Thirty physical servers are present. For 2026 we are working on reducing the amount of physical servers by cloud hosting we will report on this in 2027</p> <p>utilizes data centers from Oracle located in London.</p> <p style="text-align: center;">CDP Climate Change Questionnaire (oracle.com)</p>

Scope 1	
Scope 2	
Scope 3 (Included Sources)	
Total Emissions	

Emissions reduction targets

As this is our first year, the figures we gather in June 2027 will help provide the base total CO2 emissions for Utech/Endosoft, we can then from there evaluate and calculate what further changes can be made to reduce our CO2 and provide a forecast for the next 5 years.

Progress against these targets can be seen in the graph below: This information will be added as a measurement for JUNE 2026-2027

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2026 baseline. The carbon emission reduction achieved by these schemes equate to tCO_2e , a %ge reduction against the 20 baseline and the measures will be in effect when performing the contract

UTECH/ replaced and consolidated 75% of our old servers in our Headquarters data centre with new power-efficient servers in 2024.

UTECH/ENDOSOFT moved all third-party datacentres worldwide to virtual servers in 2024.

ISO 9001:2015 compliance. Endosoft Ltd follows the same processes as Utech Products Inc, who is ISO 9001:2015 certified.

Future Carbon Reduction Initiatives

In the future we will be implementing further measures within Endosoft Limited,

ISO 14001 and ISO 9001 (Utech products Inc is ISO 9001 certified)

UTECH/ expects to replace fluorescent lights with LED energy-efficient light sources. 100% of the light sources will be LED by 2026.

UTECH/ expects to replace 100% of current HVAC systems with energy-efficient intelligent HVAC systems by 2030.

UTECH/ expects to replace 75% of the remaining light switches with automatic sensor switches by 2026.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
